LOGIN

This is the login screen of the application. Teacher need to put userid and password for login to the application. Next page will be dashboard of the application. Each teacher will have unique user-id shared by the department.

Login Screen

Dash Board

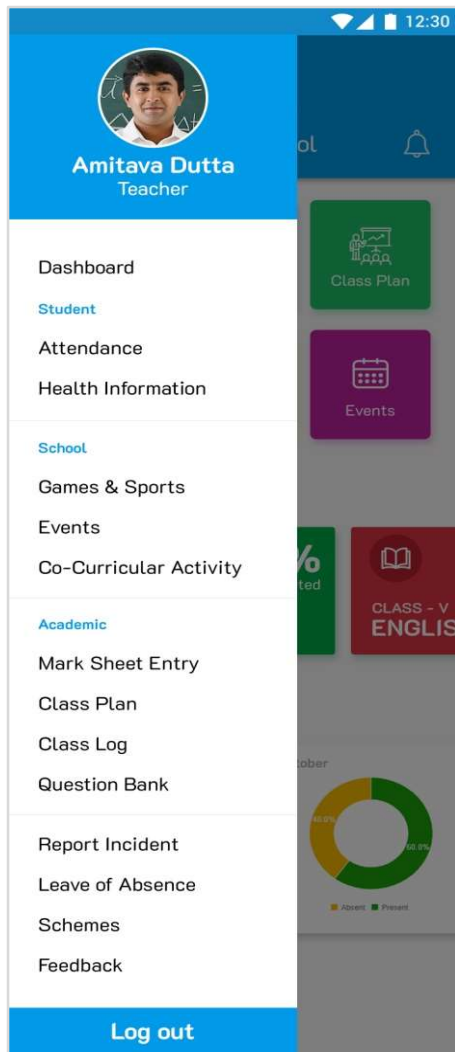

In dashboard the frequently used applications have been placed. Teachers can view student details, input attendance, prepare class plan, prepare class log, view class routine, and manage events.

There is a provision of class plan completion status as well as class schedule of the day.

Dash Board

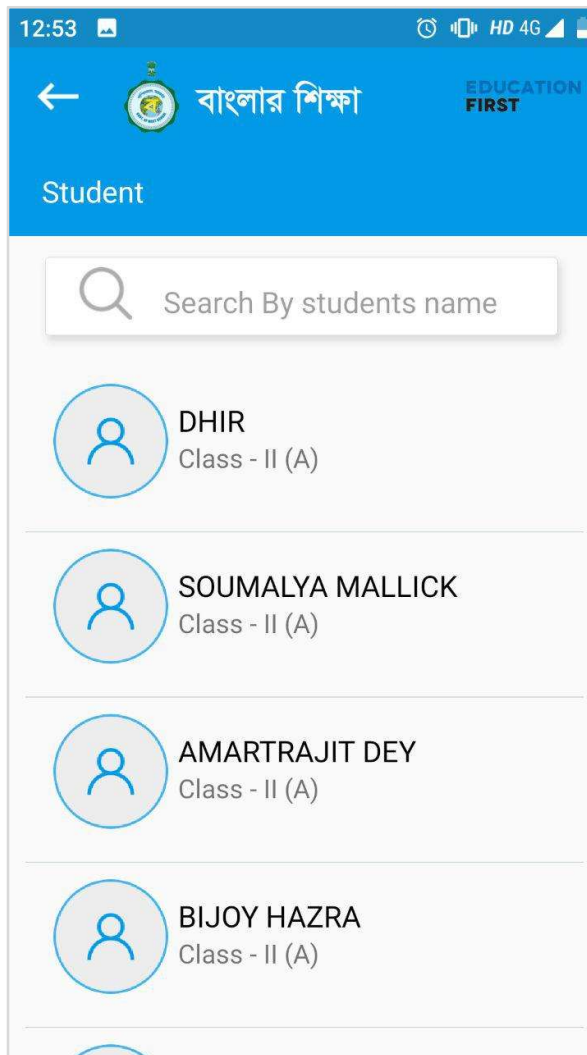

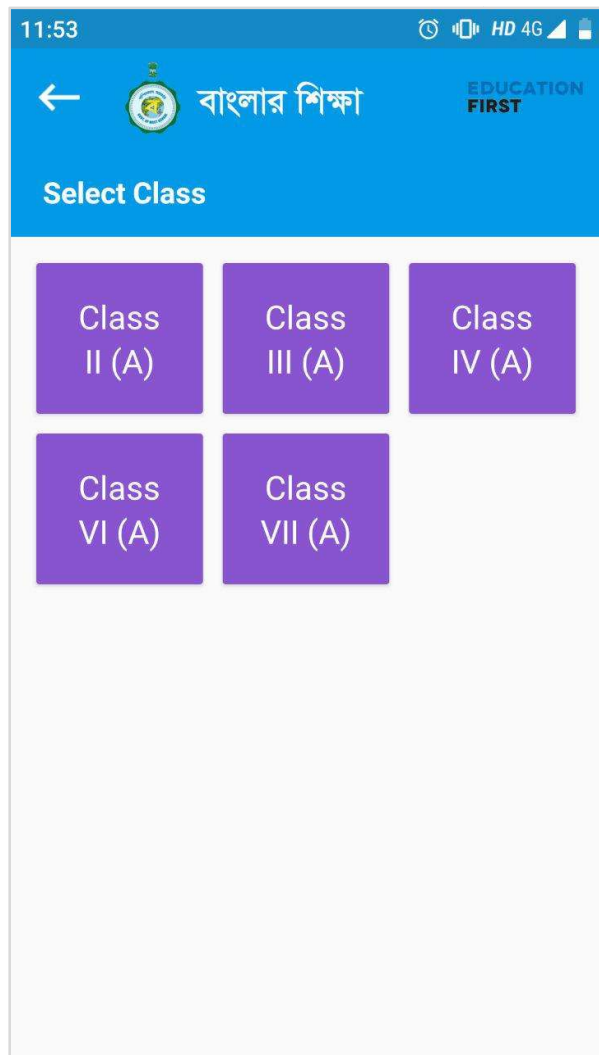

Left Panel Menu

These are the menus available under the teacher profile. Teacher's image will be displayed as profile image. The left panel contains possible menu items. This will be updated time to time with functionalities in upcoming versions of the apps. This will enable teacher to work execute most of the operation from Android mobile/tablet

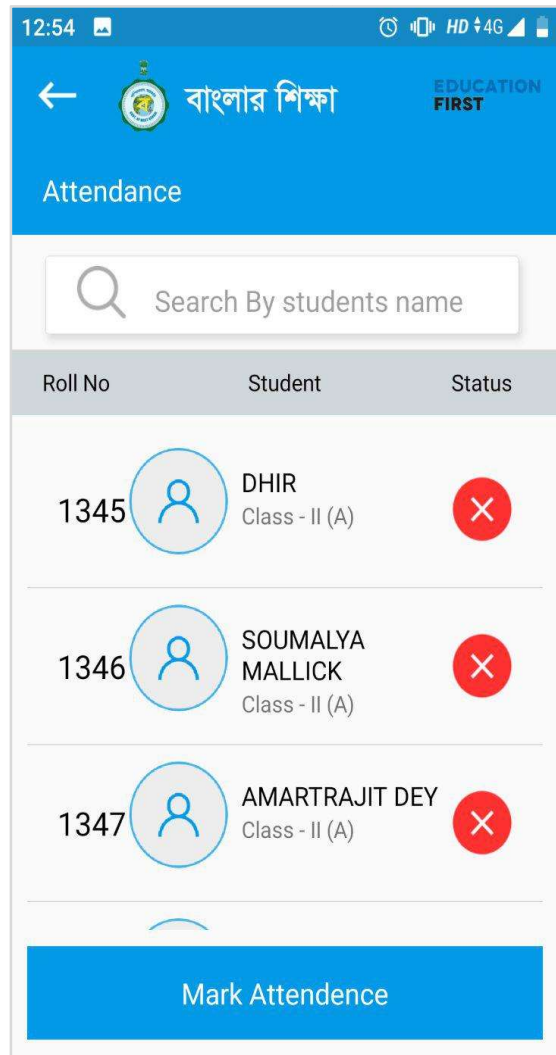

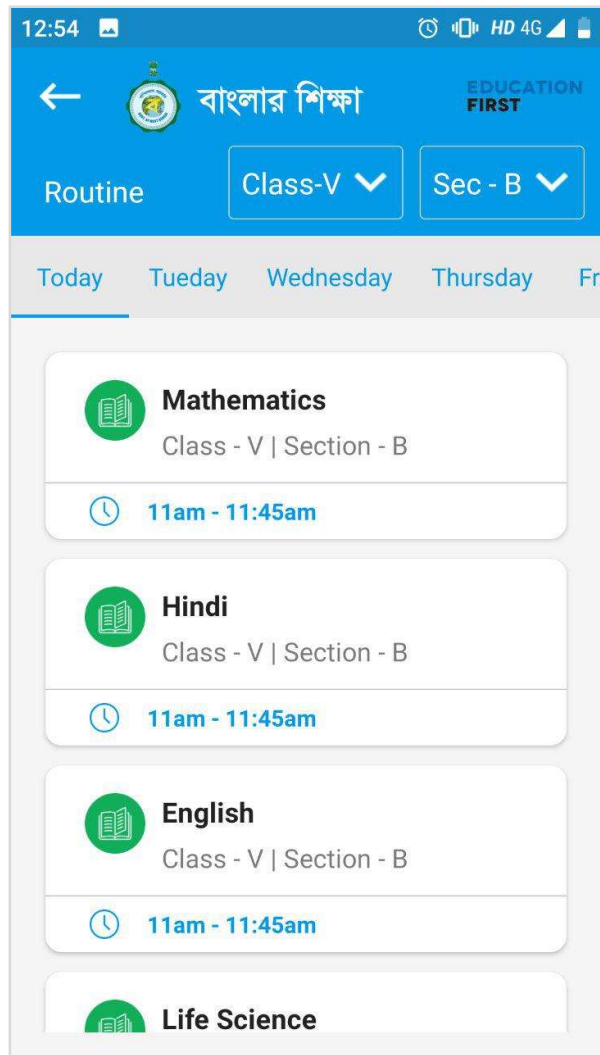

Left Panel - Menu

Class and Student Information

Teacher can find the classes allotted by Head of the Institution through class routine. Next, by selecting the class/section teacher can view the student list of respective class/section. So list of student is just a touch away in this application.

Routine and Attendance

Teacher can view class routine through this app. This helps the teacher to make class plan accordingly. Next teacher can put attendance of the students through this app. By clicking on the red crossed button under the Status column. So student attendance is now much easier activity.

Class Plan -I

The screenshot shows the 'Class Plan' form in the Education First app. The form has a blue header with the app's logo and name in Bengali. Below the header, there are four input fields: 'Select Plan Date', 'Select Class', 'Select Class Section', and 'Select Subject'. Each field has a corresponding icon (calendar, teacher, and book respectively). At the bottom of the form is a large blue button labeled 'Make Class Plan'.

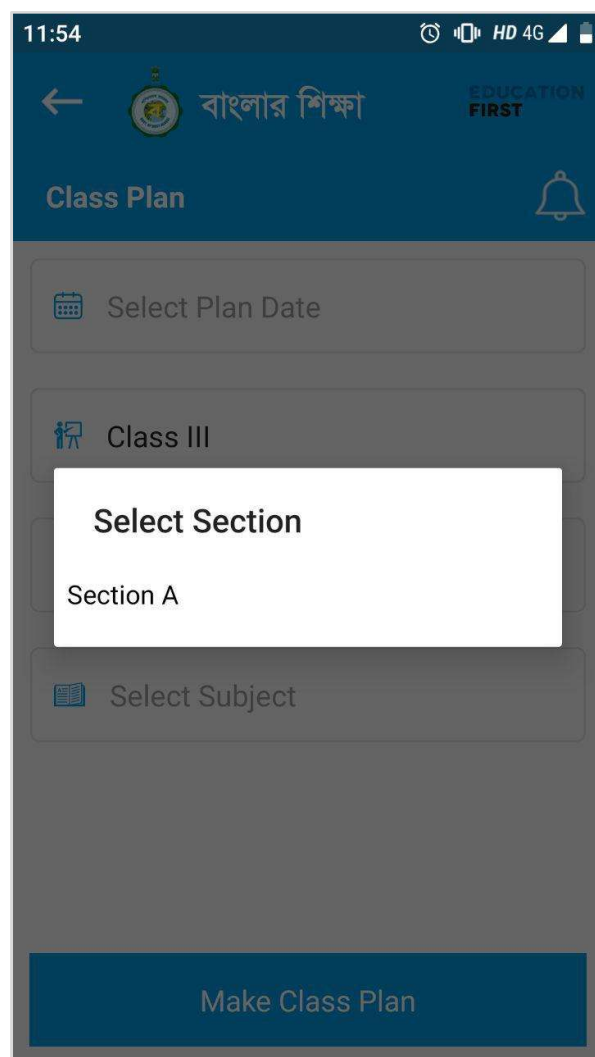

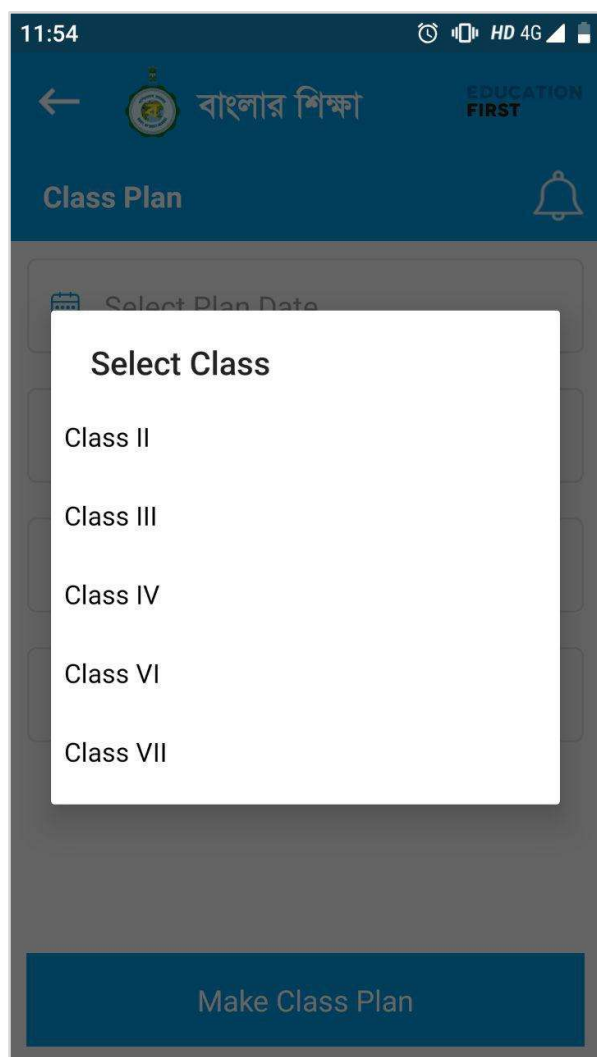

The screenshot shows the date selection calendar in the Education First app. The calendar is for January 2019. The date 'Wed, Jan 23' is highlighted. The calendar has a blue header with the year '2019' and the date 'Wed, Jan 23'. Below the header is a grid of days. The date '23' is circled in blue. At the bottom of the calendar are two buttons: 'CANCEL' and 'OK'.

S	M	T	W	T	F	S
		1	2	3	4	5
6	7	8	9	10	11	12
13	14	15	16	17	18	19
20	21	22	23	24	25	26
27	28	29	30	31		

Teacher can prepare class plan from the Android App. This is one of the important function. The left image shows the form for class plan where teacher can select Date, Class, Section and Subject. The right image shows the calendar from where date field can be selected.

Class Plan -II

Teacher can select respective class and section from the list.

-  Biology is the study of pattern ☐
-  Taxonomy and taxonomic hierarchy ☐

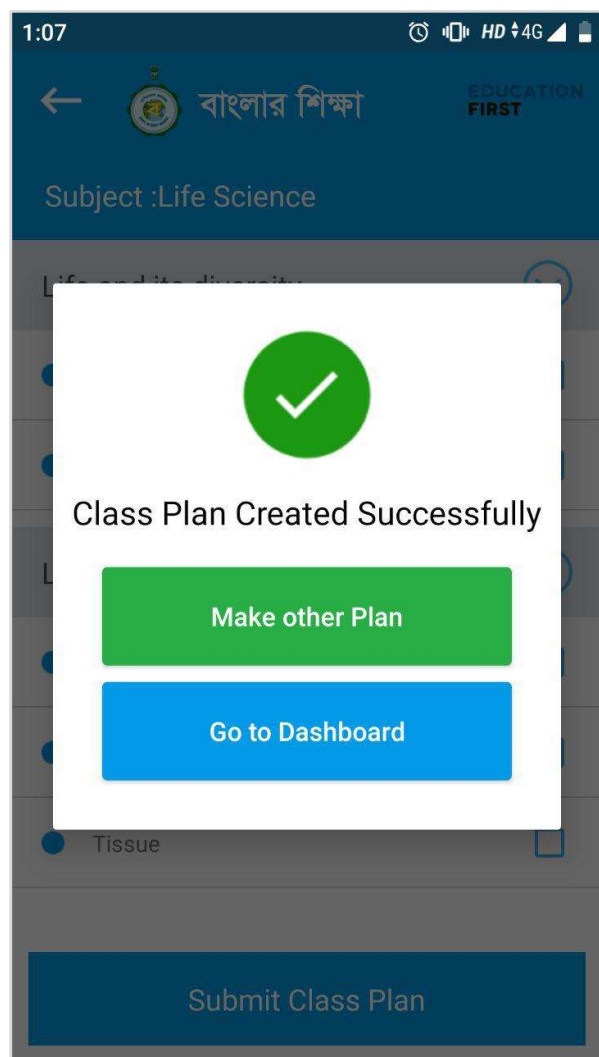

Level of organisation unit 

-  Biocules and their behaviour ☐
-  Cell ☐
-  Tissue ☐

Submit Class Plan

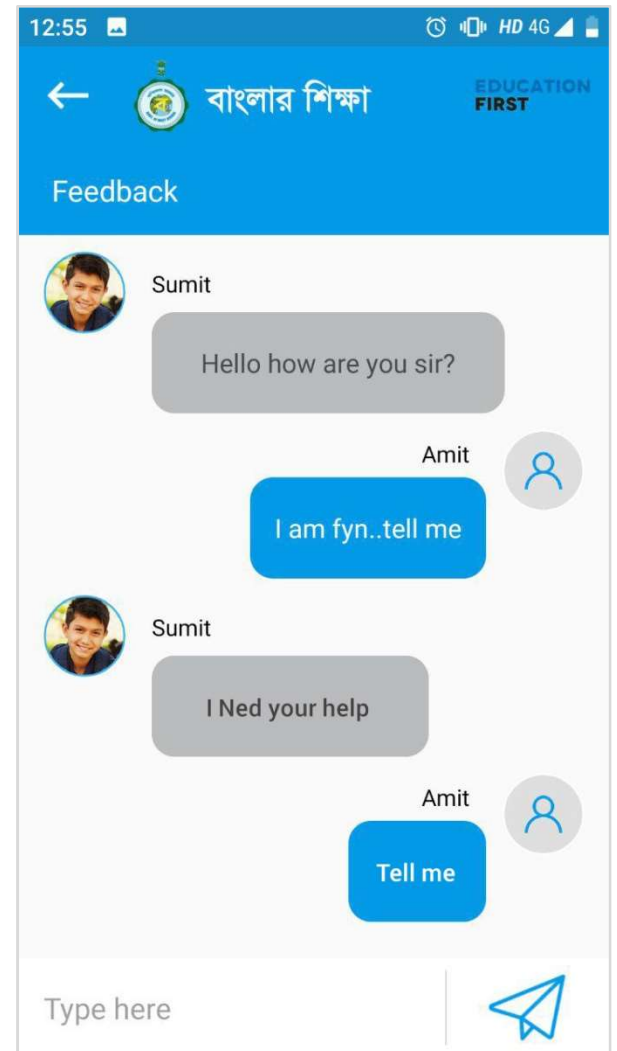

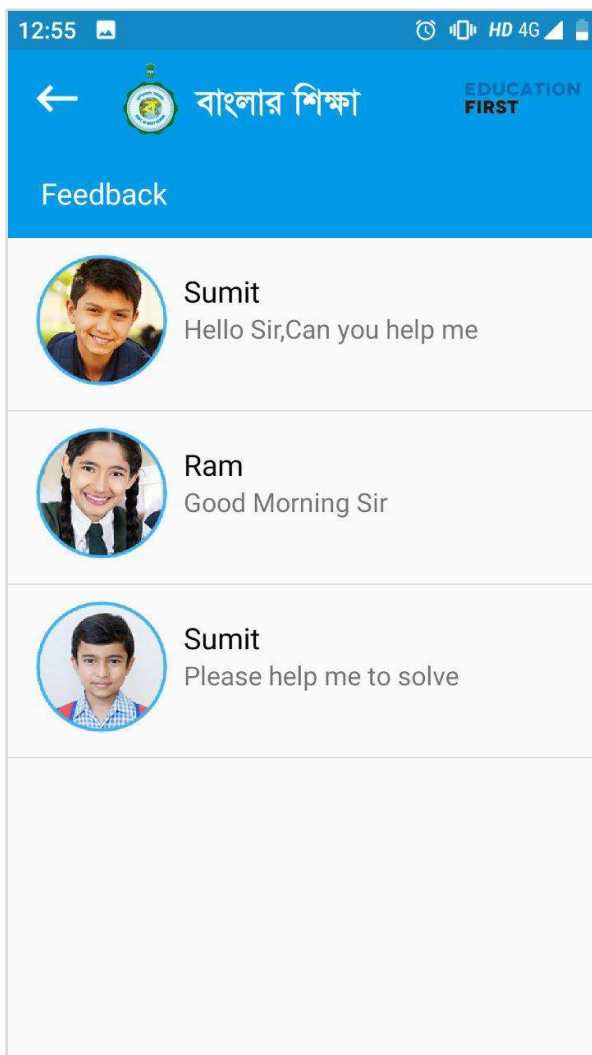

Next, teacher can select subject corresponding to the class and then syllabus content will be appeared in next step. Teacher needs to select topic and sub topic from the content and submit.

Class Plan - IV

This is the final screen of the class plan. This screen will appear after successful entry of class plan as described in previous section.

Student Communication

This is an interactive feature of the App. Student can ask query to teacher and teacher can send feedback to the students. This may be a good tool for clearing doubt.

Login Screen

Dash Board

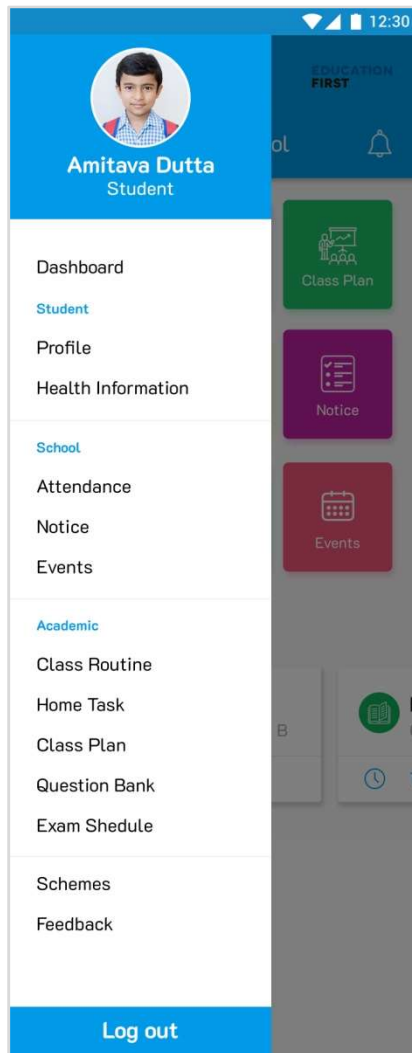

In dashboard the frequently used applications have been placed. Students can view Home Task, Attendance, Class Plan, Exam Schedule, Class Routine, Question Bank, Feedback and Events

In future more application may be placed on the dash board.

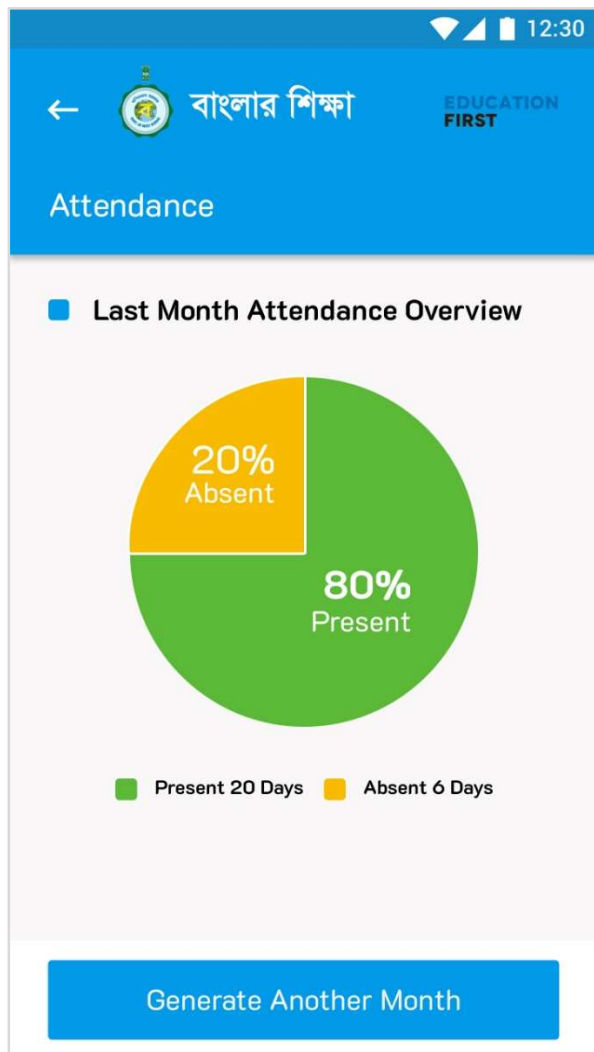

Home Screen

Left Panel Menu

These are the menus available under the student profile. Student's image will be displayed as profile image. The left panel contains possible menu items. This will be updated time to time with functionalities in upcoming versions of the apps. This will enable student to keep in touch with school activity from Android mobile/tablet

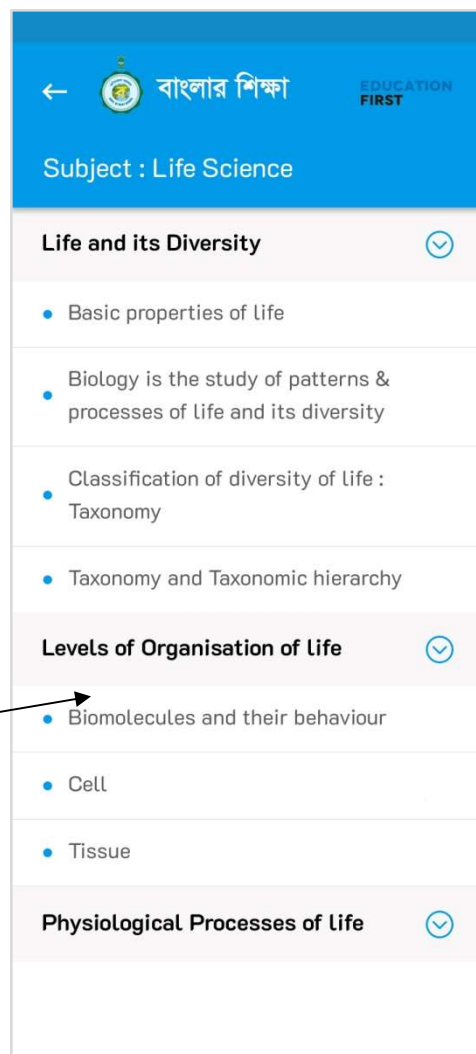

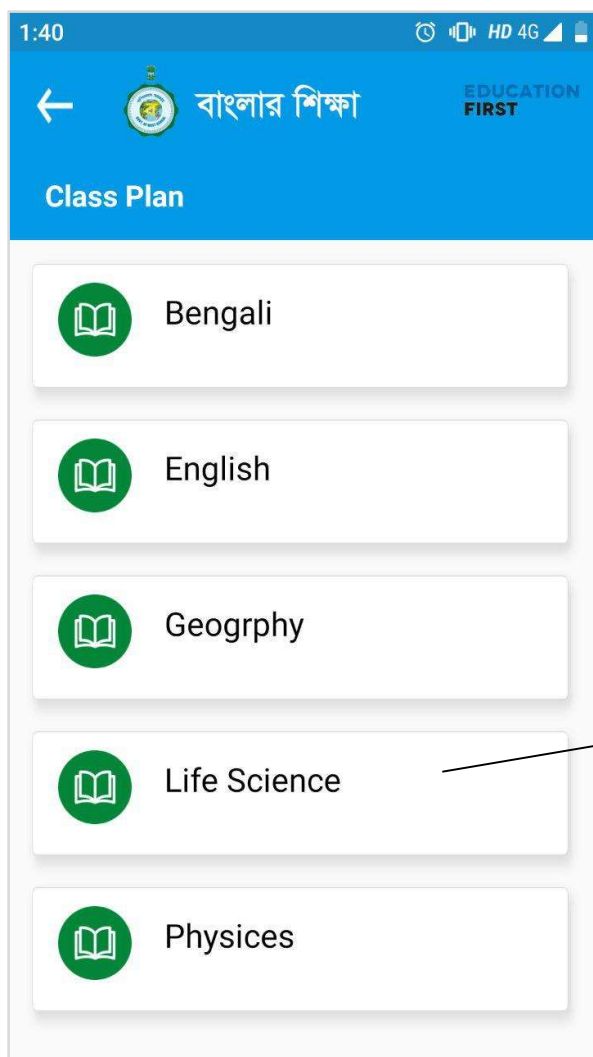

Attendance Report

The screenshot shows the 'Attendance Report' modal in the 'বাংলার শিক্ষা' (Banglar Shiksha) app. It features a 'Select Month' dropdown menu and a 'Generate Report' button. A 'Generate Another Month' button is visible at the bottom of the screen.

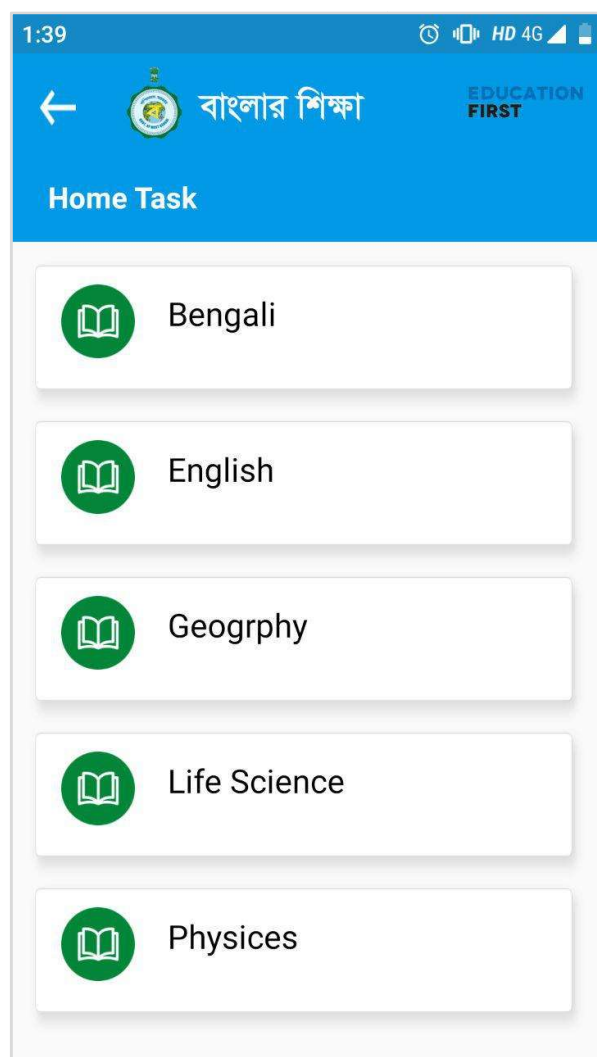

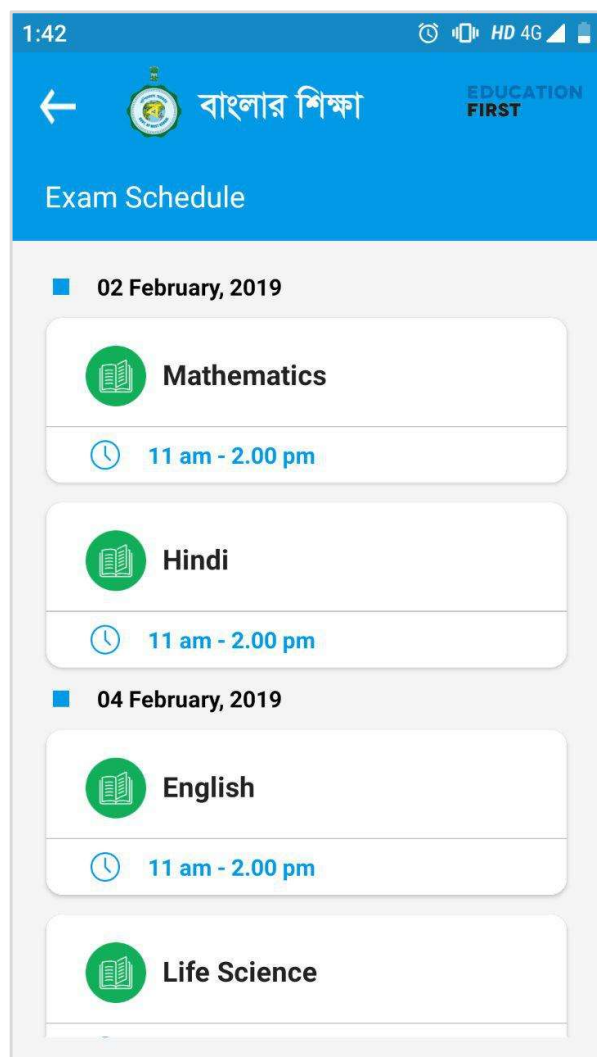

Student can view attendance report monthly basis. This will help the guardian to know about regularity of student and take necessary action if required.

Class Plan

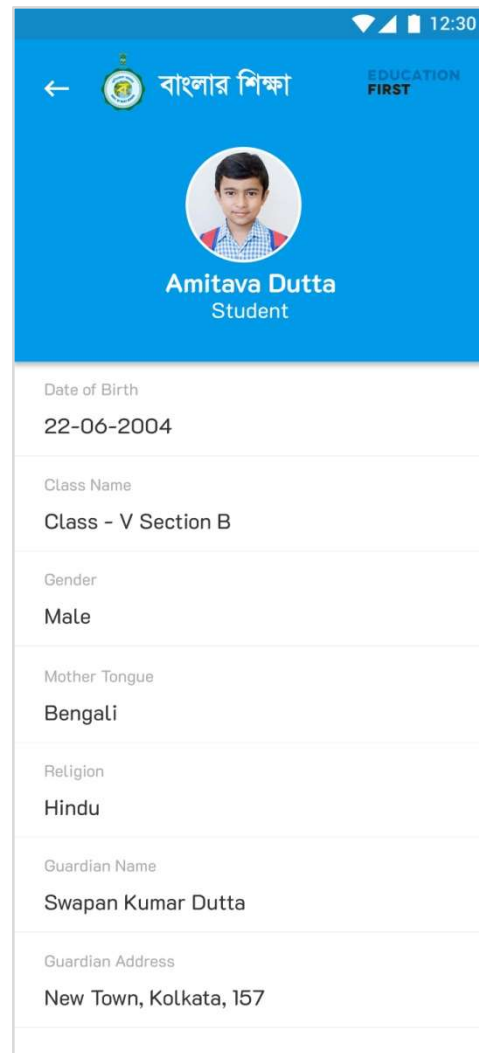

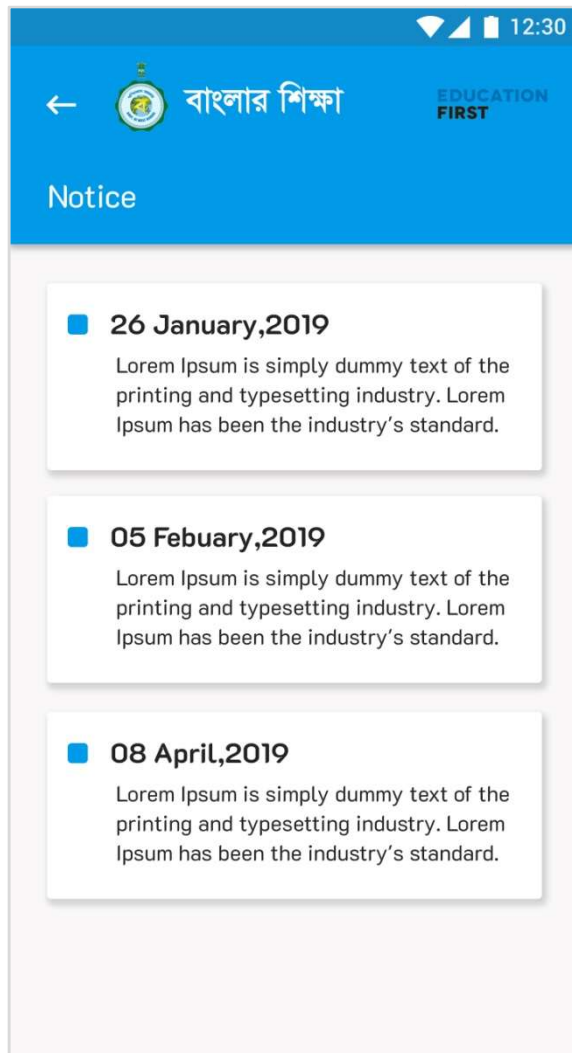

Student can view the class plan set by the teachers. This will help student as well guardian to keep in touch about what is being taught in school.

Exam Schedule & Home Task

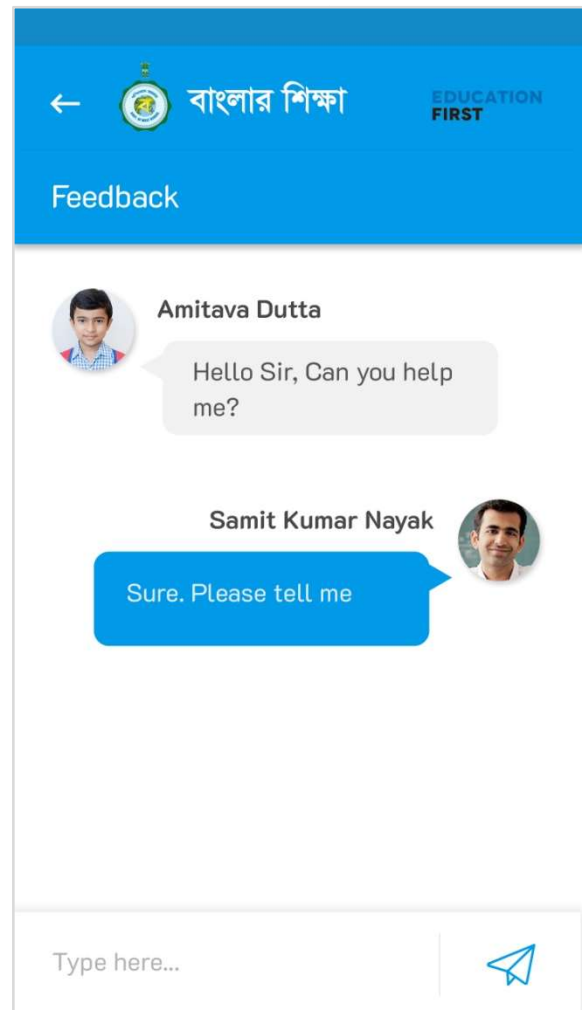

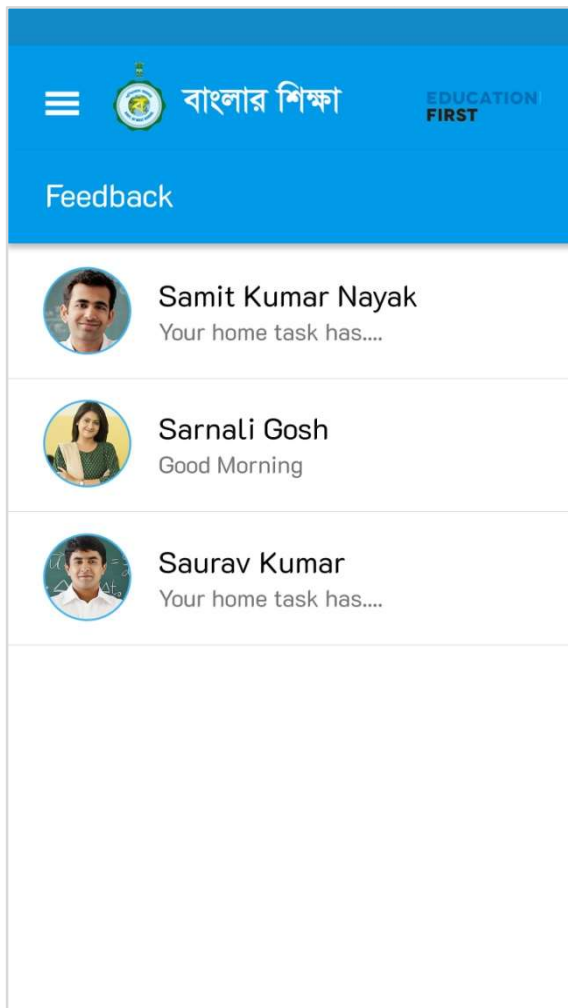

Student can get the examination schedule as well as home assignment information. There is a provision to upload home assignment by teachers which will be accessible to students of respective class/section. This will be helpful for students who could not attend school but make ready home assignment for next day.

Notice & Student Profile

Student can view notices as well as self profile information through the app.

Feedback

Student can interact with teacher for clearing doubt and any in issue.
